

A net for a Mackintosh Style Chair

for the pupils to create their own decoration for the back panel and legs.
This is based on the chair to be seen at 78 Derngate.

Fold →

Symmetry is involved in the designing of this back. Anything drawn on the chair back has to be reflected in reverse on the other side of this fold in order to match up when the chair is assembled!

- Suggested sequence for gluing:
1. Big tabs under the seat.
 2. Glue down the back .
 3. Glue the tabs on the back legs keeping the back upright.

N.B.Print onto 120gm paper or thin card.

Fold →

T is a gluing tab to be folded under.
